

Computer Security

Tools

Tools

- Here is a list of potentially useful tools and utilities with which to fight the onslaught of viruses, worms, Trojan horses, and other malware.
- Don't consider it in any way a complete list! There are lots of other tools out there, which you can find easily via Google, et. al.
- Also, I've tended to focus on Windows-based tools (with some mention of Unix/Linux-based tools), because most of you have Windows machines. Also, I don't really have access to a Unix/Linux machine.

Security/Vulnerability Scanners

The Nessus Security Scanner

<http://www.nessus.org/>

- Nessus is a vulnerability scanner, originally for Unix/Linux systems.
- It is being ported to other systems, such as MacOS and Windows.
- There is a version of Nessus for Windows called NeWT.
