

THE ART GALLERY AT RIVIER UNIVERSITY PRESENTS “IMAGES FROM A LONG VIEW OF THE EARTH”

(January 22 – February 28, 2019)

A solo exhibition of recent work by **Professor Emeritus Ron McClure** who interprets, through an intensely personal idiom, dance-like rhythms of shape and color that freewheel and intertwine when seen from aerial heights. Through photography that he deftly manipulates with a variety of digital and material techniques, the artist celebrates landscape for what it can suggest of those depths we never fully plumb even in our most sublime relationships with nature, with the arts, and with each other.
