

## **CONSTRUCTION BEGINS ON RIVIER VILLAGE**

*(From Rivier Today, Fall 2022)*

**T**he University broke ground in September 2022 on Rivier Village, an apartment-style residential complex, and the next project in the multi-year campus enhancement plan.

The complex will occupy the city block across from the Science and Innovation Center and Muldoon Fitness Center on South Main Street. Pre-existing structures have been cleared from the block along Oldfield Road to make way for the construction of two residential buildings and ample parking for students.

Construction will be completed by August 2023, and Rivier Village will welcome students for the Fall 2023 semester. ■
