

RIVIER VILLAGE TO OPEN IN FALL 2023

(From *Rivier Today*, Spring 2023)

The initial construction of Rivier Village is on track for completion. The University will open its two newest, apartment-style residence halls this fall across from the Science and Innovation Center on South Main Street.

Demand exceeded supply for this new, independent-living option, with more than 100 upper-level students applying for the 72 soon-to-be-available Rivier Village beds. Each apartment suite will contain four-to-six single bedrooms, multiple bathrooms, a living room, a full kitchen, and washer and dryer units. Additionally, each resident will have an assigned parking space.

Rivier Village residents have the option of a 12-month rental, allowing them to live on campus during the summer to take advantage of local internships and employment opportunities. ■
