

RIVIER ACHIEVES RECORD ENROLLMENT

(From *Rivier Today*, Fall 2023)

Welcoming 2,822 students in September 2023, the University recorded the highest fall enrollment in its history. Continued growth in the undergraduate student population and strong upward trends in the international graduate population were the largest contributors to the total enrollment number.

Expanded outreach has drawn students from 32 states and 21 countries including Bangladesh, Vietnam, and Zimbabwe. In addition to graduate study, Raiders Athletics has extended its reach nationally and internationally, recruiting student-athletes from a more geographically diverse prospect pool.

“Rivier is attracting more students from all over the world,” says **Paul Brower, Vice President for Enrollment Management**. “It’s amazing to see the increased activity and diversity on campus and the sense of community and connection that develop as a result of greater student enrollment and engagement.” ■
