STAFF PICK OF THE MONTH

"Miss Fisher's Murder Mysteries" Recommended by Kati MacFarline

I've been binging these on Netflix, and they are SO fun! I've been on a mystery novel kick, so these are just a great supplement. Set in 1920s Australia, they follow the adventures of Phryne (pronounced FRY-nee) Fisher, a self-proclaimed "lady detective" and bane of the Melbourne Police Department. The characters are all so charming and lovable, and it truly feels like the '20s, with music, costumes, scenery and all. Edge-of-your-seat action and lots of fun!

Would you rather be able to stop or travel through time?
I think I would rather travel through time. As a history major, I would love to go and experience what life was like in different time periods, or have the opportunity to experience world events first hand. Getting a glimpse at the future would probably be too cool too!

Who would you choose to ghostwrite your autobiography?
If I could choose anyone, I think I would have to be Mitch Albom. His novels are very lighthearted and fun to read, and he possesses an amazing ability to highlight the important aspects of life to really get people thinking. So, I think I would make my autobiography very thought provoking and more interesting than it probably is.

What is your favorite library program/service?
My favorite library program/service would easily have to be the therapy dogs! Even though I don't get to see them much as I work nights, I think they are a great pleasure to have on campus. Not only are they the dogs, great stress relievers, which make for a great study break, they are incredibly cute! Make sure you watch out for emails for the next scheduled doggie date!
